Response to Amendment

1. The indicated allowability of claim 2 is withdrawn in view of the newly discovered reference(s) to Huang. Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

- a. Claims 1, and 3-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gaiser in view of Huang. Regarding claims 1 and 3-8, the rejection to Gaiser from paragraph (a) from the previous Office Action, paper No. 3 is incorporated herein. Additionally regarding claim 1, Gaiser discloses the main body formed of a rod member (10) and the hand grip (12) made from foam being fitted over the rod member. Gaiser discloses all of the limitations of the claimed invention except for the shock-absorbing sleeve made from rubber and the tape being wound around the sleeve. Thus, Huang discloses a grip of an exercise device having a main body (30) formed of a rod member and a shock-absorbing (col. 4, lines 11-15) sleeve (36) made from a rubber material (col. 4, line 59) fitted over the rod (col. 3, lines 39-40) where grip tape is wound on the sleeve (col. 4, lines 57-59). It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the device of Gaiser

Art Unit: 3764

in view of the teaching of Huang that such a shock-absorbing sleeve is capable of dampening vibration of a golfer's swing while practicing hitting a golf ball.
